

Terms and Conditions Report: Introduction

February 2020

The attached report provides several columns of data concerning senior centers in Calendar Year 2019 as requested by the City Council, including Program Type, Average Daily Participants, Average Daily Meals, and Weighted Service Utilization.

Please note that two senior centers not included in this list are temporarily closed and in the process of relocating (CCNS Hillcrest and Corona). Additionally, all social clubs are included except for the 12 transferred to DFTA's portfolio in November 2019. The contract amendments for these clubs have not all been registered to date. Once the registrations are complete, all contractors will start the invoices/ reporting and information will start to become available.

Terms and Conditions Report February 2020: Addendum
Definition of Utilization and Weighted Utilization

Utilization is the extent to which contracted providers use their contracted/planned capacity:

$$\text{Utilization} = \left(\frac{\text{Actual Units}}{\text{Planned Units}} \right)$$

The weighted utilization produces a calculation in which some elements of the data set (service) carry more importance than others based on the percent of the planned service budget allocated to the service. Weighted utilization is calculated by multiplying the utilization of each service by its weight and then adding the products (sub-totals):

$$\text{Weighted Utilization} = \left(\frac{\text{SCE Actual}}{\text{SCE Planned}} \times \text{SCE \% of Planned Service Budget} \right) + \left(\frac{\text{AIB Actual}}{\text{AIB Planned}} \times \text{AIB \% of Planned Budget} \right) + \left(\frac{\text{HPP Actual}}{\text{HPP Planned}} \times \text{HPP \% of Planned Service Budget} \right)$$

Included Services

SCE: Education, Recreation, Technology

AIB: Assistance, Information and Benefits

HPP: Health Promotion (Evidence-Based and Non-Evidence-Based)
