National Economy

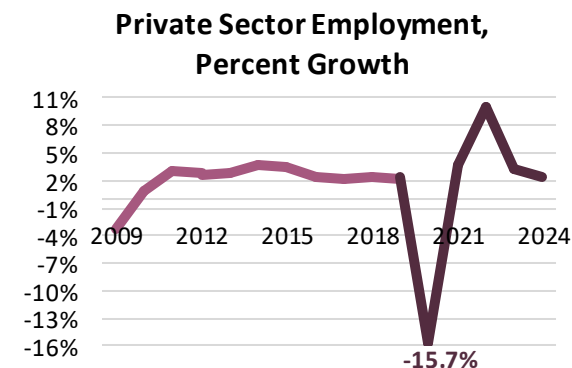

Source: IHS Markit

- Advanced estimate from the Bureau of Economic Analysis shows a drop of 4.8 percent in GDP in the first quarter of 2020
- Real GDP and employment will contract sharply in the 2020 but are forecasted to begin recovering by 2021.
- Over 30 million people have filed for unemployment – wiping away all jobs created since the Great Recession.

City Economy

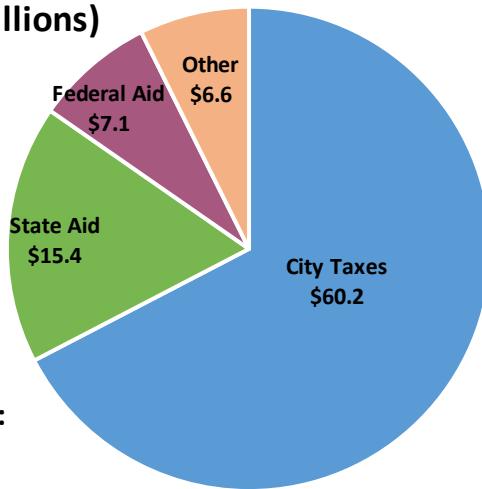

- New York City's economy expanded at a solid pace in 2019.
- Real GCP and private sector employment are expected to drop sharply in 2020 but are expected to recover in 2021.
- While all industries are facing disruptions from COVID-19, the hardest hit sectors include transportation, food services, accommodation, arts & entertainment and retail.

Taxes Forecast

- Council Finance forecast of tax revenues are \$296 million over OMB in Fiscal 2020, and \$367 million over OMB in Fiscal 2021.
- Council Finance forecasts a 3.0 percent contraction in tax collections in Fiscal 2021.
- Business taxes will suffer the most during the recovery period and collections for Fiscal 2021 are expected to drop by 17.1 percent.

FY 20-24, Average Revenue Growth Forecast, OMB and NYCC Finance

Revenue Risks

- COVID-19 remains the single greatest risk to our revenues given we do not fully understand it.
- Risk of a global economy contraction due to COVID-19.
- Non-financial firms have undertaken extensive borrowing. Servicing this debt under current conditions will be difficult for some firms.
- The financial condition of state and local government may weaken the economy as they face unprecedented challenges in balancing their budgets.
- Risk stem from the Federal economic response to COVID-19 as some aspects are not sufficiently funded and more resources are needed.
- Growing risk of deflation.
- Tensions with China and fears of contagion will further disrupt trade, which would be a drag on the economy.
