

DISEASE **Preliminary rate of new cases per 100,000, March 1, 2020
through September 30, 2020**

Tuberculosis[†]	2.8
HIV	10.4
Measles	0
Hepatitis B[§]	25.33
Hepatitis C[§]	20.91

[†]Tuberculosis data reflects rate of new cases of active TB disease, not rate of new TB infections.

[§]The case definition for chronic hepatitis C is only for people 3 years and older, thus the population denominator necessarily excludes persons under 3 years of age. The hepatitis B rate includes all ages in the population denominator.
