

Terms and Conditions Report

Covering Calendar 2023

(January through December 2023)

The attached report provides several columns of data concerning older adult centers in calendar year 2023 as requested by the City Council, including Provider Type, Average Daily Participants, Average Daily Meals, and Service Utilization. The attached report provides this information.

The weighted utilization produces a calculation in which some elements of the data set (service) carry more importance than others based on the percent of the planned service budget allocated to the service. The services included in this measure are:

- SCE: Education, Recreation, Technology;
- AIB: Assistance, Information and Benefits; and,
- HPP: Health Promotion (Evidence-Based and Non-Evidence-Based).

Weighted utilization is calculated by multiplying the utilization of each service by its weight and then adding the products (sub-totals):

$$\text{Weighted Utilization} = \left(\frac{\text{SCE Actual Units}}{\text{SCE Planned Units}} \times \text{SCE \% of Planned Service Budget} \right) + \left(\frac{\text{AIB Actual Units}}{\text{AIB Planned Units}} \times \text{AIB \% of Planned Service Budget} \right) + \left(\frac{\text{HPP Actual Units}}{\text{HPP Planned Units}} \times \text{HPP \% of Planned Service Budget} \right)$$
