

Terms and Conditions Report
Covering Calendar 2024
(January through December 2024)

The attached report provides data concerning older adult centers in calendar year 2024 as requested by the City Council, including Provider Type, Average Daily Participants and Average Daily Meals.

Explanations for Weighted Utilization Data Not Available for 2024

Due to the migration of financial systems from HHS Accelerator to PASSPort Financials in 2023 and 2024, NYC Aging is unable to extract certain indicators unique to NYC Aging and directly contribute to this report. These indicators are captured through the Cost Center data fields in HHS Accelerator, which includes each providers' unique spending per service, based on their individual cost allocation plan. Missing or empty fields reflect this issue due to missing indicators in PASSPort Financials. Furthermore, please note that the calculation for Weighted Service Utilization includes units of service and cost center detail, both of which we currently do not have given the transition from HHS Accelerator Financials to PASSPort.
