

## STH Routed-Unrouted Comparison: December 2024 vs July 2025

The primary difference between these reporting periods is the length of time they cover. The December report includes 4 months; September-December while the July report covers 6 months; January-June. This helps to explain why there are more STH students included in the July report. In the July report, there are more students who were routed and fewer who were waiting to be routed. There are also more students who opted for OMNY (previously MetroCards) and Self transport in the July report.

December 2024 and July 2025 STH Routed-Unrouted Comparison		
Category	Count of Students: December 2024	Count of Students: July 2025
Routed	7,191	8,730
