GENERAL PURPOSES

The “Special Jerome Corridor District” established in this Resolution is designed to promote and protect public health, safety and general welfare. These general goals include, among others, the following specific purposes:

- (i) to encourage well-designed buildings that complement the built character of the Highbridge, Concourse, Mount Eden, Mount Hope, Morris Heights, and University Heights neighborhoods;
- (ii) to achieve a harmonious visual and functional relationship with the adjacent neighborhoods;
- (iii) to enhance neighborhood economic diversity by broadening the range of housing choices for residents at varied incomes;
- (iv) to create a livable community combining housing, retail and other uses throughout the district;
- (v) to create a walkable, urban streetscape environment through a mix of ground floor uses;
- (vi) to create a lively and attractive built environment that will provide daily amenities and services for the use and enjoyment of area residents, workers and visitors;

- (vii) to provide flexibility of architectural design within limits established to assure adequate access of light and air to the street, and thus to encourage more attractive and economic building forms on zoning lots with irregular shapes and on zoning lots fronting on the elevated rail structure along Jerome and River Avenues; and
- (viii) to promote the most desirable use of land in accordance with a well-considered plan and thus conserve the value of land and buildings, and thereby protect the City's tax revenues.

The provisions of this Chapter shall apply within the #Special Jerome Corridor District#. The regulations of all other Chapters of this Resolution are applicable, except as superseded, supplemented or modified by the provisions of this Chapter. Such dormers need not decrease in width as the height above the maximum base height increases.

A #ground floor level street# frontage along any other #street# shall be considered a #secondary street frontage#. For the purposes of this Section, defined terms shall include those in Sections 12-10 and 37-311.

The provisions of this Section shall apply to #developments# or #ground floor level enlargements#.

(a) Along #primary street frontages#

For #buildings# with #primary street frontage#, or portions thereof, #uses# on the #ground floor level#, to the minimum depth set forth in Section 37-32 (Ground Floor Depth Requirements for Certain Uses), shall be limited to non-#residential uses#, except for Type 1 lobbies and entrances and exits to #accessory#

The level of the finished floor of such ground floor shall be located not higher than five feet above nor lower than five feet below the as-built level of the adjoining #street#.

141-33

Special Open Space Provisions

Along the elevated rail structure on Jerome or River Avenues, where open space is provided between the #street line# of the #zoning lot# and the #street wall# of a #building# facing the elevated rail structure, or in Subdistrict A, for Subareas A1 through A3, where open space is provided between the #street wall# and the corner at a location designated on Maps 2, 3 or 4 in the Appendix to this Chapter, the provisions of Section 28-23 (Planting Areas) shall apply to all #buildings#, whether the ground floor is occupied by #residential uses# or non- #residential uses#, subject to the modifications of this Section.

(a) Along the elevated rail structure

Along the elevated rail structure on Jerome or River Avenues, a sidewalk widening, built to Department of Transportation standards, may be provided as an alternative to planting, provided that the area that would otherwise be allocated to planting, measured in square feet, is allocated to streetscape amenities, including, but not limited to, trees, bicycle racks, benches or wall treatment, are provided along such sidewalk widening, as set forth below.

Where benches are provided as an alternative to such planting, the length of such benches shall not exceed, in the aggregate, 15 feet per every 50 feet of #street wall# frontage. Where bicycle racks are provided, such racks shall be oriented so that the bicycles are placed parallel to the #street wall#, and the width of such bicycle racks shall not exceed, in the aggregate, 10 feet per every 50 feet of #street wall# frontage. Such benches or bicycle racks shall be located entirely within the #zoning lot#, and each bench or bicycle rack so provided shall be equivalent to 15 square feet of planted area.

Where trees, and associated tree pits are provided as an alternative, the minimum depth of any open space between the #street wall# and #street line# shall be eight feet. Each tree provided shall be equivalent to 15 square feet of planted area.

Where a wall treatment is provided as an alternative, it shall be in the form of permitted #signs#, graphic or sculptural art, rustication, decorative screening or latticework, or living plant material along the #street wall#. Such wall treatment shall extend to a height of at least 10 feet, as measured from the level of the adjoining sidewalk or grade, and shall have a minimum width of 10 feet, as measured parallel to the #street wall#. Portions of a #street wall# providing such wall treatment may be exempt from the ground floor glazing requirements of paragraph (a) of Section 141-32, provided that the exempted area not exceed 50 percent of the #street wall#, or a #street wall# width of 20 feet, whichever is less. The portion of the #street wall# allocated to a wall treatment shall satisfy the planting requirement directly in front of such #street wall#.

Where planting is provided, the minimum depth of open space between the #street line# and the #street wall# shall not be less than three feet.

(b) In Subdistrict A

in Subdistrict A, where open space is provided between the #street wall# and the intersection of two #streets#, pursuant to paragraph (a)(2) of Section 141-22, streetscape amenities may be provided as an alternative to planting, provided that the area that would otherwise be allocated to planting, measured in square feet, is allocated to trees, benches, or tables and chairs, as set forth below. However, planting shall not be reduced to less than 20 percent of the area of the open space.

Each bench provided shall be equivalent to 10 square feet of planted area, and each set of tables and at least two chairs shall be equivalent to 15 square feet of planted area. Seating shall be publicly accessible, unless tables and chairs are associated with an open eating or drinking establishment on the #zoning lot#. The area under such seating shall be paved with permeable materials and shall either abut the adjoining sidewalk or be connected to such sidewalk by a circulation path at least five feet wide that is also paved with permeable materials.

Each tree and associated tree pits provided shall be equivalent to 15 square feet of planted area, and shall be located at least 10 feet from any #building wall# or the adjoining sidewalk.

Where planting is provided, the minimum depth of a planted bed shall not be less than three feet.

In no event shall chain link fencing or barbed or razor wire be permitted in any open space provided pursuant to this Section.
